CLYNT UY

EXPERIENCE

Software Engineering Intern, Data Science Team
Dashlabs.ai (July 2021 — present)

- Created and deployed a predictive model for patient inflow of healthcare laboratories, preventing unnecessary stockpiling and shortages of laboratory items.
- Interpreted and extracted information from large-scale data.
- Optimized a time-series forecasting model using multiple imputation method on missing data, increasing forecast accuracy by 10%

Mobile Developer, Engineering Team Member
Google Developer Student Clubs (Sept 2020 — Dec 2020)

- Developed a to-do list in Flutter that was used in a workshop series which allowed viewers to learn about structures and animations
